The First Horror Film: The Haunted Castle / La Manoir du diable (1896) While it is debated, this short from French pioneer Georges Méliès is often considered the first horror movie. The silent film, starring The Devil himself, paved the way for the scares that would make the horror genre one of cinema's most enduring conventions.

The ideas include innovative concepts, technologies, techniques and movements, from the silent era's masterpieces to today's blockbusters and art house movies, these highly illustrated pages are a chance to rediscover films from five continents.

This accessible book demonstrates how ideas influenced and defined graphic design. Lavishly illustrated, it is both a great source of inspiration and a provocative record of some of the best examples of graphic design from the last hundred years. The entries, arranged broadly in chronological order, range from technical (overprinting, rub-on designs, split fountain); to stylistic (swashes on caps, loud typography, and white space); to objects (dust jackets, design handbooks); and methods (paper cut-outs, pixelation).

This compelling book chronicles the most influential ideas that have shaped photography from the invention of the daguerreotype in the

early 19th century up to the digital revolution and beyond. Each idea is presented through lively text and arresting visuals, and explores when the idea first evolved and its subsequent impact on photography.

The Story of Hollywood follows Hollywood from its dusty origins to its glorious rise to stardom. Lavishly illustrated with over 800 vintage images from the author's private collection, the book tells the complete story of Hollywood including its eventual decline and urban renewal. Both the playground of stars and the boulevard of broken dreams, Hollywood transformed American society with its motion pictures that revolutionized the entertainment world. The Story of Hollywood brings new insights to readers. with a passion for Hollywood and its place in the history of film, radio, and television.

This innovative title looks at the history of the Web from its early roots in the research projects of the US government to the interactive online world we know and use today. Fully illustrated with images of early computing equipment and the inside story of the online world's movers and shakers, the book explains the origins of the Web's key technologies, such as hypertext and mark-up language, the social ideas that underlie its networks, such as open source, and creative commons, and key moments in its development, such as the movement to broadband and the Dotcom Crash. Later ideas look at the origins of social networking and the latest developments on the Web, such as The Cloud and the Semantic Web. Following the design of the previous titles in the series, this book is in a new, smaller format. It provides an informed and fascinating illustrated history of our most used and fastest-developing technology.

This inspiring book chronicles the most influential ideas that have shaped industrial and product design. Written by two experts on modern design, it provides a concise history of the subject, and offers a fascinating resource to dip into for the general reader. From the origins of modern design in the craft movements of the 19th and early 20th century, and the changes brought about by mass production, the book traces the most important ideas in design through the modern movement and post-war consumer society to more recent ideas such as Open-Source Design and Biomimicry.

From the earliest cave paintings through to the internet and street art, this inspiring book chronicles the 100 most influential ideas that have shaped the world of art. Arranged in broadly chronological order, it provides a source of inspiration and a fascinating resource for the general reader to dip into. The book shows how developments in materials and technology have radically changed the way that art is produced. Each entry explores when an idea first evolved and how it has resurfaced in the work of different artists up to the present day. Illustrated with historical masterpieces and packed with fascinating contemporary examples, this is an inspirational and wholly original guide to understanding the forces that have shaped world art.

Spanning several generations—from newcomers to Oscar Award-winning veterans—this volume features a discussion of the movies that shaped the careers of these filmmakers and, in turn, cinema history. Here directors, including Peter Bogdanovich, Kimberly Peirce, Arthur Hiller, and John Waters, explore the film they saw at an especially formative moment, how it influenced their own work—or, in some cases, led them to tell stories through movies themselves—and the effects it had on their thoughts about cinema. Revealing stories include how

after watching Rebel Without a Cause, John Woo started combing his hair like James Dean and even began talking like him; Apocalypse Now inspired Danny Boyle to take risks and make larger-than-life films; and a line in The Wizard of Oz—"Who could ever have thought a good little girl like you could destroy all my beautiful wickedness?"—has become almost a personal mantra or prayer for John Waters.
