The most complete book on gazebos and arbors you can buy. The Complete Guide to Gazebos & Arbors shows basic techniques for building sheltering structures in the landscape, and provides complete project plans and directions for more than 12 versatile, flexible architectural projects. An overhead arbor can turn a patio or deck into a cool oasis from which to enjoy a landscape, while a gazebo can serve as a full-fledged outdoor room with protective walls, ceilings, and even electrical service. Every reader will find this book to be an indispensable source of planning, design, and practical how-to information.

This book focuses on emerging issues in usability, interface design, human–computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interaction with products, services and systems, and focuses on finding effective approaches for improving user experience. It also discusses key issues in designing and providing assistive devices and services to individuals with disabilities or impairment, to assist mobility, communication, positioning, environmental control and daily living. The book covers modelling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Virtual reality, digital environments, heuristic evaluation and forms of device interface feedback of (e.g. visual and haptic) are also among the topics covered. Based on the both the AHFE 2019 Conference on Usability & User Experience and the AHFE 2019 Conference on Human Factors and Assistive Technology, held on July 24-28, 2019, Washington D.C., USA, this book reports on cutting-edge findings, research methods and user-centred evaluation approaches.

A comprehensive guide to get up and running with build automation using Gradle About This Book Practical and engaging from start to finish covering the fundamentals of Gradle Learn the skills required to develop Java applications with Gradle and integrate at an enterprise level Apply the correct plugin and configuration to our Gradle build files to work with the different languages Who This Book Is For This book is for Java developers who have working knowledge of build automation processes and are now looking to gain expertise with Gradle and add to their skill set. What You Will Learn Write your first Gradle Script Write build logic with the Gradle build language Explore the Java plugins supported by Gradle Understand dependency management in Gradle Package and publish your (web) application Integrate Scala and Groovy with Gradle Write your own custom tasks and plugins Integrate Gradle with your IDE In Detail Gradle is a project automation tool that has a wide range of applications. The basic aim of Gradle is to automate a wide variety of tasks performed by software developers, including compiling computer source code to binary code, packaging binary codes, running tests, deploying applications to production systems, and creating documentation. The book will start with the fundamentals of Gradle and introduce you to the tools that will be used in further chapters. You will learn to create and work with Gradle scripts and then see how to use Gradle to build your Java Projects. While building Java application, you will find out about other important topics such as dependency management, publishing artifacts, and integrating the application with other JVM languages such as Scala and Groovy. By the end of this book, you will be able to use Gradle in your daily development. Writing tasks, applying plugins, and creating build logic will be your second

nature. Style and approach This step-by-step guide aims to cover the fundamentals of Gradle and focuses on providing the practical skills required to develop web application.

If you went into the woods with just a knife, your wits, and the shirt on your back, could you survive? If you'd read this book from New York Times bestselling author, Tim MacWelch, the answer is yes! The latest paperback release in Weldon Owen's popular Outdoor Life series sees New York Times-bestselling author and survival expert Tim MacWelch explore survival situations. MacWelch examines how native peoples around the world throughout history have made their own shelter, weapons, tools, and more, while detailing clever MacGyver-esque ideas for using anything you might find in your pockets or pack to guarantee survival. Readers will be prepared to test themselves against nature, to be prepared for any catastrophe, or to learn more about traditional ways of survival.

Explains how to use this beautiful, versatile, and sustainable material to create an array of items for the home or garden, offering detailed how-to instructions for more than thirty eco-friendly projects that include a trellis for climbing plants, a porch swing, an outdoor shower stall, and a curved garden handrail. Original.

Swatch Reference Guide for Fashion Fabrics is an all-in-one text and swatch book that focuses on the unique needs of students in fashion design, apparel merchandising, and

product development.

"Includes plans and step-by-step instructions for building several greenhouses and other garden projects. Projects suitable to homes and landscapes in urban, suburban and rural settings"--Provided by publisher.

The original, complete, user-friendly introduction to natural building, now fully revised and updated The popularity of natural building has grown by leaps and bounds, spurred by a grassroots desire for housing that is healthy, affordable, and environmentally responsible. While there are many books available on specific methods such as straw-bale construction, cob, or timber framing, there are few resources which introduce the reader to the entire scope of this burgeoning field. Fully revised and updated, The Art of Natural Building is the complete and user-friendly introduction to natural building for everyone from the do-it-yourselfer to architects and designers. This collection of articles from over fifty leaders in the field is now stunningly illustrated with over two-hundred full-color photographs of natural buildings from around the world. Learn about: The case for building with natural materials, from the perspectives of sustainability, lifestyle, and health What you need to know to plan and design your own beautiful and efficient natural home Explanations of thirty versatile materials and techniques, with resources on where to go for further information on each How these techniques are being used to address housing crises around the world. Clearly

written, logically organized, and beautifully illustrated, The Art of Natural Building is the encyclopedia of natural building. Joseph F. Kennedy is a designer, builder, writer, artist, educator, and co-founder of Builders Without Borders. Michael G. Smith is a respected workshop instructor, consultant, and co-author of the best-selling book The Hand-Sculpted House . Catherine Wanek is a co-founder of Builders Without Borders and author/photographer of The Hybrid House and The New Straw Bale Home .
