Eighth Edition

instruction, interlibrary loan, circulation, reserve services, special collections, serials, media services and government documents.

Used in library schools worldwide, this standard text provides students with a thorough understanding of technical services. Updated and expanded, the eighth edition further emphasizes the rapidly changing environment in which technical services are conducted. The book covers all aspects of the field—from acquisitions to managing the cataloging department—with five new chapters. "Technical Services Issues" includes material related to physical space needs; "E-resources Issues" examines how the growth of e-materials impact technical services work; "Copy Cataloging" reflects the ever increasing need to be more efficient and also to save limited funds for

Technical Services activities; "Overview and Decisions" addresses the issue of why and how the local OPAC has become a gateway to the universe of knowledge; and "Processing Materials" covers the activities involved in making sure items that go into a library's collection are properly identified as belonging to the library and where the item is physically located in the collection. All other chapters have been extensively rewritten and updated to reflect 2010 technical service functions and activities. Complete with helpful illustrations, statistics, and study guide questions, this text is a must for library and information science students!

Evans and new co-author Greenwell pay close attention to management in "new normal" straitened economic conditions and the pervasive impact of technology on

collaboration and sharing, and the drive to use data for evaluation purposes are just a few of the changes now driving collection management. This updated edition of a classic text addresses changes in the field and provides a thorough overview of what collection development specialists now need to know to effectively and efficiently manage processes that range from selection and assessment to sharing resources, handling challenges, weeding, and preservation. Readers will find increased coverage of technical services, intellectual freedom and censorship, and collection policy development, as well as budget development and tracking, joint purchasing, and negotiating with vendors. Updates on e-resources, user needs assessment (including data visualization), and disaster management, along with suggestions for further reading, are also included. Engagingly written and easy to

their careers and for use in LIS programs, this "comprehensive overview" (Journal of Access Services) has been thoroughly revised and updated to provide a timely exploration of the characteristics of academic librarianship and its place in the ever-changing environment of higher education. Evans and new coauthor Greenwell guide readers towards understanding what is required to have a successful career in academic librarianship, explaining why academic libraries are distinct from other types of libraries and lending practical insight into their unique political and operational characteristics. The text offers comprehensive coverage of such key issues as teaching faculty roles and the status of the academic librarian; governance and the growing tension on some campuses between faculty and administration; curriculum,
