Presenting psychology as an applied discipline that can help adult educators be more effective in their work, this book analyses the cultural factors that influence the characteristics, behaviour and thinking of adult learners. It emphasizes the collective orientation of African cultures and the view of the self in terms of interdependent relationships within a community. The chapters provide an introduction to the psychology of adult learning and address the following: characteristics of adult learning; life span development; human motivation and participation; learning styles; facilitating adult learning; and guidance and counselling of adult learners.

Written to help readers understand and develop expertise in both teaching and learning, Educational Psychology focuses on the art and science necessary to become an expert teacher. Renowned scholars, Sternberg and Williams help readers capitalize on their strengths by integrating questions into the text that encourage analytical, creative, and practical thinking. This framework, based on Sternberg's triarchic theory of human intelligence, helps ensure that readers think deeply about what they are learning, rather than merely processing information at a superficial level. In addition, Educational Psychology also: Shows Readers How to Use Text Principles in the Classroom Expert Teacher Interviews illustrate the classroom application of chapter material. The Flexible Expert feature provides examples of solutions-analytical, creative, and practical-for daily challenges both students and teachers face in the classroom. Implications for Teaching illustrate the strategies expert teachers use in the classroom, using specific concepts of educational psychology. Encourages Reflective Thinking Thinking Questions-Thinking Analytically, Thinking Creatively, and Thinking Practically-appear throughout each chapter to encourage readers to think deeply about chapter concepts. Constructing Your Own Learning activities help readers understand constructivism by using the theory themselves to build upon what they have read in the text. Forum debates illustrate contested educational issues -such as homogenous versus heterogeneous grouping-and show that there are middle-ground positions between extreme views of the issues. Becoming an Expert: Questions and Problems, grouped by elementary, middle, and high school settings, invite readers to apply chapter concepts to the problems of classroom practice. Emphasizes Diversity, Helping Prepare Teachers for the Classrooms of Today and Tomorrow Guidelines for providing support for gifted students and students with disabilities are presented in Chapter 5: Individual Differences. The educational implications of socioeconomic, cultural, gender and linguistic diversity are discussed in detail in Chapter 6: Group Differences.

This book constitutes the refereed proceedings of the 47th Annual Conference of the Southern African Computer Lecturers' Association on ICT Education, SACLA 2018, held in Gordon's Bay, South Africa, in June 2018. The 23 revised full papers presented together with an extended abstract of a keynote paper were carefully reviewed and selected from 79 submissions. The papers are organized in topical sections: playfulness, media and classrooms, academia and careers, teaching programming, adaptation and learning, teamwork and projects, learning systems, topic teaching.

Early childhood, from birth through school entry, was largely invisible worldwide as a policy concern for much of the twentieth century. Children, in the eyes of most countries, were 'appendages' of their parents or simply embedded in the larger family structure. The child did not emerge as a separate social entity until school age (typically six or seven). 'Africa's Future, Africa's Challenge: Early Childhood Care and Development in Sub-Saharan Africa' focuses on the 130 million children south of the Sahel in this 0-6 age group. This book, the first of its kind, presents a balanced collection of articles written by African and non-African authors ranging from field practitioners to academicians and from members of government organizations to those of nongovernmental and local organizations. 'Africa's Future, Africa's Challenge' compiles the latest data and viewpoints on the state of Sub-Saharan Africa's children. Topics covered include the rationale for investing in young children, policy trends in early childhood development (ECD), historical perspectives of ECD in Sub-Saharan Africa including indigenous approaches, new threats from HIV/AIDS, and the importance of fathers in children's lives. The book also addresses policy development and ECD implementation issues; presents the ECD programming experience in several countries, highlighting best practices and challenges; and evaluates the impact of ECD programs in a number of countries.

The search for answers to the issue of global sustainability has become increasingly urgent. In the context of higher education, many universities and academics are seeking new insights that can shift our dependence on ways of living that rely on the exploitation of so many and the degradation of so much of our planet. This is the vision that drives SANORD and many of the researchers and institutions within its network. Although much of the research is on a relatively small scale, the vision is steadily gaining momentum, forging dynamic collaborations and pathways to new knowledge. The contributors to this book cover a variety of subject areas and offer fresh insights about chronically under-researched parts of the world. Others document and critically reflect on innovative approaches to cross-continental teaching and research collaborations. This book will be of interest to anyone involved in the transformation of higher education or the practicalities of cross-continental and cross-disciplinary academic collaboration. The Southern African-Nordic Centre (SANORD) is a network of higher education institutions from Denmark, Finland, Iceland, Norway, Sweden, Botswana, Namibia, Malawi, South Africa, Zambia and Zimbabwe. Universities in the southern African and Nordic regions that are not yet members are encouraged to join.
