This classic textbook in the field, now completely revised and updated, provides a bridge between theory and practice. Appropriate for the second course in Finance for MBA students and the first course in Finance for doctoral students, the text prepares students for the complex world of modern financial scholarship and practice. It presents a unified treatment of finance combining theory, empirical evidence and applications.

Includes section "Reviews".

A monograph that surveys the technology and empirics of text analytics in finance. It presents various tools of information extraction and basic text analytics, surveying a range of techniques of classification and predictive analytics algorithms.

Based on a descriptive interpretation of the Opinions and Standards issued by the Accounting Principles Board and the Financial Accounting Standards Board, it provides students with an authoritative and thorough grounding in financial accounting theory. Provides a framework within which to operate by discussing financial accounting topics and expands on these topics by including readings directly connected with each of the chapters. In addition, it contains end-of-chapter multiple-choice and essay questions related to the material. Adapted from recent Uniform CPA Examinations, these questions provide exposure to the types of issues the Board of Examiners has stressed in recent years.
