Fire In The Valley The

Fire in the Valley is the definitive history of the personal computer, drawn from interviews with the people who made it happen, written by two veteran computer writers who were there from the start. Working at InfoWorld in the early 1980s, Swaine and Freiburger daily rubbed elbows with people like Steve Jobs and Bill Gates when they were creating the personal computer revolution.

Fire in the Valley: The Birth and Death of the Personal ...

Fire in the Valley is one of the seminal books on the history of personal computing and still has value. Over time, most books on the subject have tended to focus on the chosen few who have become household names (especially Jobs and Gates), but at the time when this book was first written, it was not yet obvious who would be canonized in the long run.

Fire in the Valley: The Making of the Personal Computer by ...

Fire in the Valley is the story of their efforts, and in particular, the contributions of an informal think tank called the Homebrew Computer Club. Its technically gifted community, comprising sci-fi aficionados and Berkeley counterculturists, believed computers could usher in an age of human empowerment, perhaps even a utopia.

On Sept. 13, 2018, at 4:04 p.m., an alarm sounded at a natural gas monitoring center in Columbus, Ohio. High-pressured natural gas had just been released into a low-pressure gas line in Massachusetts' Merrimack Valley. Soon, buildings in Lawrence, Andover and North Andover would explode and catch fire. Thousands of people would be ordered to flee their homes and seek safety on the streets.

In the 1970s, while their contemporaries were protesting the computer as a tool of dehumanization and oppression, a motley collection of college dropouts, hippies, and electronics fanatics were engaged in something much more subversive. Obsessed with the idea of getting computer power into their own hands, they launched from their garages a hobbyist movement that grew into an industry, and ultimately a social and technological revolution. What they did was invent the personal computer: not just a new device, but a watershed in the relationship between man and machine. This is their story. Fire in the Valley is the definitive history of the personal computer, drawn from interviews with the people who made it happen, written by two veteran computer writers who were there from the start. Working at InfoWorld in the early 1980s, Swaine and Freiberger daily rubbed elbows with

people like Steve Jobs and Bill Gates when they were creating the personal computer revolution. A rich story of colorful individuals, Fire in the Valley profiles these unlikely revolutionaries and entrepreneurs, such as Ed Roberts of MITS, Lee Felsenstein at Processor Technology, and Jack Tramiel of Commodore, as well as Jobs and Gates in all the innocence of their formative years. This completely revised and expanded third edition brings the story to its completion, chronicling the end of the personal computer revolution and the beginning of the post-PC era. It covers the departure from the stage of major players with the deaths of Steve Jobs and Douglas Engelbart and the retirements of Bill Gates and Steve Ballmer; the shift away from the PC to the cloud and portable devices; and what the end of the PC era means for issues such as personal freedom and power, and open source vs. proprietary software.

Traces the history of the personal computer industry, focusing on the individuals who developed new microcomputers and software, and created new computer companies.

Chronicles History of Computer Pioneers & the Industry They Founded

fantasy adventure series by screenwriter John August. Some trails lead to magic. Some lead to danger. As Arlo looked around, the walls of his room began to vanish, revealing a moonlit forest. Only his bed remained, and the frame of his window, through which he saw the girl. The world on her side of the glass was sparkling with silver and gold, like a palace made of autumn leaves. She looked off to her right. Someone was coming. Her words came in an urgent whisper: "If I can see you, they can see you . . . Be careful, Arlo Finch." Arlo Finch thought becoming a Ranger meant learning wilderness skills, like camping and knots. But upon arriving in the tiny town of Pine Mountain, Colorado, Arlo soon learns there's so much more. His new friends Indra and Wu teach him how to harness the wild magic seeping in from the mysterious Long Woods—a parallel realm of wonder and danger. First he must master the basics, including snaplights, thunderclaps and identifying supernatural creatures. But Arlo Finch is no ordinary Ranger, and this is no ordinary time. A dark and ancient force is sending threats into the real world . . . our world. Through perilous adventures and close calls, Arlo is awakened to his unique destiny—but the obstacles he faces will test the foundations of the Ranger's Vow: loyalty, bravery, kindness, and truth. A Junior Library Guild selection

NATIONAL BESTSELLER CNBC and Strategy + Business Best Business Book of 2017 "A mind-blowing tour along the path from sex and drugs to R&D." - Financial Times It's the biggest revolution you've never heard of, and it's hiding in plain sight. Over the past decade, Silicon Valley executives like Eric Schmidt and Elon Musk, Special Operators like the Navy SEALs and the Green Berets, and maverick scientists like Sasha Shulgin and Amy Cuddy have turned everything we thought we knew about high performance upside down. Instead of grit, better habits, or 10,000 hours, these trailblazers have found a surprising short cut. They're harnessing rare and controversial states of consciousness to solve critical challenges and outperform the competition. New York Times bestselling author Steven Kotler and high performance expert Jamie Wheal spent four years investigating the leading edges of this revolution—from the home of SEAL Team Six to the Googleplex, the Burning Man festival, Richard Branson's Necker Island, Red Bull's training center, Nike's innovation team, and the United Nations' Headquarters. And what they learned was stunning: In their own ways, with differing languages, techniques, and applications, every one of these groups has been quietly seeking the same thing: the boost in information and inspiration that altered states provide. Today, this revolution is spreading to the mainstream, fueling a trillion dollar underground economy and forcing us to rethink how we can all lead

richer, more productive, more satisfying lives. Driven by four accelerating forces—psychology, neurobiology, technology and pharmacology—we are gaining access to and insights about some of the most contested and misunderstood terrain in history. *Stealing Fire* is a provocative examination of what's actually possible; a guidebook for anyone who wants to radically upgrade their life.

Even small applications have dozens of components. Large applications may have thousands, which makes them challenging to install, maintain, and remove. Docker bundles all application components into a package called a container that keeps things tidy and helps manage any dependencies on other applications or infrastructure. *Docker in Action, Second Edition* teaches you the skills and knowledge you need to create, deploy, and manage applications hosted in Docker containers. This bestseller has been fully updated with new examples, best practices, and entirely new chapters. You'll start with a clear explanation of the Docker model and learn how to package applications in containers, including techniques for testing and distributing applications. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications.

in the Mojave Desert tell a story of powerful Earth forces, adapting life forms, and early man. This 9 x 12 book is overflowing with beautiful photos and interpretive text on this National Park for your enjoyment.

"Frank Boyden and Tom Coleman are two of our country's most gifted ceramicists, each having spent a lifetime mastering the ceramic medium. Both are established leaders in the field and both have examples of their individual artworks in various museum collections throughout the United States&... "One may wonder why two successful artists would come together to create a body of collaborative art. The answer is simple. Each recognizes that the other has talents as a ceramic artist that complement his own expert abilities and, most important, each has the aspiration to participate in the creation of artwork over and beyond his individual capabilities. They both acknowledge the potential for achieving spectacular results through their combined efforts&..."

discover strategies to overcome enemy strongholds, defeat death, and set the captives free. Along the way, you'll experience the joys of close fellowship while gleaning wisdom from Elijah, Enoch, and a very special dinner host—the Lord Himself.

The true story of one of the most devastating wildfires in Australian history and the search for the man who started it. On the scorching February day in 2009, a man lit two fires in the Australian state of Victoria, then sat on the roof of his house to watch the inferno. What came to be known as the Black Saturday bushfires killed 173 people and injured hundreds more, making them among the deadliest and most destructive wildfires in Australian history. As communities reeling from unspeakable loss demanded answers, detectives scrambled to piece together what really happened. They soon began to suspect the fires had been deliverately set by an arsonist. The Arsonist takes readers on the hunt for this man, and inside the puzzle of his mind. But this book is also the story of fire in the Anthropocene. The command of fire has defined and sustained us as a species, and now, as climate change normalizes devastating wildfires worldwide, we must contend with the forces of inequality, and desperate yearning for power, that can lead to such destruction. Written with Chloe Hooper's trademark lyric detail and nuance, The Arsonist is a reminder that in the age of
