experience psychology? Experience Psychology is a complete learning system that empowers students to personally, critically, and actively experience the impact of psychology in everyday life. Experience Psychology is about, well, experience—our own behaviors; our relationships at home and in our communities, in school and at work; and our interactions in different learning environments. Grounded in meaningful real-world contexts, Experience Psychology ' s contemporary examples, personalized author notes, and applied exercises speak directly to students, allowing them to engage with psychology and to learn verbally, visually, and experientially—by reading, seeing, and doing. With the Experience Psychology learning system, students do not just “ take ” psychology but

How many students think they know everything about introductory psychology but struggle on the first exam? LearnSmart, McGraw-Hill ' s adaptive learning system, pinpoints students ' metacognitive abilities and limitations, identifying what they know—and more importantly, what they don ' t know. Using Bloom ' s Taxonomy and a highly sophisticated “ smart ” algorithm, LearnSmart creates a personalized, customized study plan that ' s unique to each individual student ' s demonstrated needs. With virtually no administrative overhead, instructors using LearnSmart are reporting an increase in student performance by a letter-grade or more. Throughout Experience Psychology, students find a wealth of personal pedagogical “ asides ”

directly from Laura King to guide their understanding and stimulate their interest as they read. Some of these helpful notes highlight crucial terms and concepts; others prompt students to think critically about the complexities of the issues; other notes encourage students to apply what they have learned to their prior reading or to a new situation. These mini-conversations between author and students help develop analytical skills for students to carry and apply well beyond their course. Experience an Emphasis on Critical Thinking Experience Psychology stimulates critical reflection and analysis. Challenge Your Thinking sidebar features involve students in debates relevant to findings from contemporary psychological research. suffered under one of the worst sieges in the history of warfare. At least one million civilians died, many during the terribly cold first winter. Bearing the brunt of this hardship—and keeping the city alive through their daily toil and sacrifice—were the women of Leningrad. Yet their perspective on life during the siege has been little examined. Cynthia Simmons and Nina Perlina have searched archival holdings for letters and diaries written during the siege, conducted interviews with survivors, and collected poetry, fiction, and retrospective memoirs written by the *blokadnitsy* (women survivors) to present a truer picture of the city under siege. In simple, direct, even heartbreaking language, these documents tell of lost husbands, mothers, children; meager rations often supplemented with sawdust
