Since 1940, when Dr. J.C. Boileau Grant created the first lab manual based on Grant's method of dissection, Grant's Dissector has clearly established its authority and preeminence as the "gold standard" of gross anatomy dissection manuals. In the last edition, the material was streamlined to focus on more accurate, specific and clear steps, based on market conditions and feedback. This edition continues to focus on the trend of reduced lab hours yet maintains the quality and reliability of Grant's original manual. Grant's Dissector, Fourteenth Edition features over 40 new figures to provide consistent appearance and include additional details, and is cross-referenced to the leading anatomy atlases, including Grant's, Netter's, Rothen, and Clemente.

This 11th edition has been reorganized to separate the clinical notes and details from the dissection instructions. A brief introduction precedes each structure's dissecting instructions, and blank observation boxes are provided for insertion of notes. Line drawings and radiographs are included.

Grant's Dissector walks students step by step through dissection procedures in the anatomy lab. Each chapter is consistently organized, beginning with a brief study of surface anatomy followed by concise coverage of osteology, presenting important foundational structures that will aid in localization of soft tissue structures. Each unit begins with a "Dissection Overview," a guide to the procedures to be accomplished during the session. This is followed by "Dissection Instructions," with a logical sequence and numbered steps for the dissection. Each dissection concludes with a "Dissection Review" that presents a numbered list of tasks illustrating the important features of the dissection and encouraging the synthesis of information.

The Dissection Overview provides a blueprint of what needs to be accomplished during the dissection session, and includes relevant surface anatomy as well as concise coverage of osteology. Dissection Instructions offer a logical sequence and numbered steps for the dissection. The Dissection Follow-up emphasizes important features of the dissection and encourages students to reflect on and synthesize the information"--
