This six-volume handbook covers the latest practice in technical and vocational education and training (TVET). It presents TVET models from all over the world, reflections on the best and most innovative practice, and dozens of telling case studies. The handbook presents the work of established as well as the most promising young researchers and features unrivalled coverage of developments in research, policy and practice in TVET.

Acknowledging and understanding spiritual formation is vital in contemporary education. This book explores the dynamic relationship between education and wellbeing. It examines the theory underpinning the practice of education in different societies where spirituality and care are believed to be at the heart of all educational experiences. The book recognizes that, regardless of the context or type of educational experience, education is a caring activity in which the development of the whole person - body, mind and spirit - is a central aim for teachers and educators in both formal and informal learning. The chapters in this handbook present and discuss topics that focus on spirituality as an integral part of human experience and, consequently, essential to educational programs which aim to address personal and communal identity, foster resilience, empathy and compassion, and promote meaning and connectedness.

This state-of-the-art, comprehensive Handbook is the first of its kind to fully explore the interconnections between social justice and education for citizenship on an international scale. Various educational policies and practices are predicated on notions of social justice, yet each of these are explicitly or implicitly shaped by, and in turn themselves shape, particular notions of citizenship/education for citizenship. Showcasing current research and theories from a diverse range of perspectives and including chapters from internationally renowned scholars, this Handbook seeks to examine the philosophical, psychological, social, political, and cultural backgrounds, factors and contexts that are constitutive of contemporary research on education for citizenship and social justice and aims to analyse the transformative role of education regarding social justice issues. Split into two sections, the first contains chapters that explore central issues relating to social justice and their interconnections to education for citizenship whilst the second contains chapters that explore issues of education for citizenship and social justice within the contexts of particular nations from around the world. Global in its perspective and definitive in content, this one-stop volume will be an indispensable reference resource for a wide range of academics, students and researchers in the fields of Education, Sociology, Social Policy, Citizenship Studies and Political Science.

The two volumes of the second edition of the International Handbook of Educational Change comprise a totally new, and updated collection of the most critical and cutting-edge ideas in educational change. Written by the most influential thinkers in the field, these volumes cover educational change at both the theoretical and practical levels. The updated handbook remains connected to the classical concerns of the field, such as educational innovation, reform, and change management, and also offers new insights into educational change that have been brought about by social change and shifting contexts of educational reform. Like the first best selling Handbook, this one will also undoubtedly become an essential resource for people involved in all spheres of education, from classroom teachers, teacher leaders and administrators to educational researchers, curriculum developers, and university professors. No other work provides such a wide-ranging and comprehensive examination of the field of educational change.

This volume is a detailed and up-to-date reference work providing an authoritative overview of the main issues in higher education around the world

today. Consisting of newly commissioned chapters and impressive journal articles, it surveys the state of the discipline and includes the examination and discussion of emerging, controversial and cutting edge areas.

The International Handbook of Jewish Education, a two volume publication, brings together scholars and practitioners engaged in the field of Jewish Education and its cognate fields world-wide. Their submissions make a significant contribution to our knowledge of the field of Jewish Education as we start the second decade of the 21st century. The Handbook is divided broadly into four main sections: Vision and Practice: focusing on issues of philosophy, identity and planning -the big issues of Jewish Education. Teaching and Learning: focusing on areas of curriculum and engagement Applications, focusing on the ways that Jewish Education is transmitted in particular contexts, both formal and informal, for children and adults. Geographical, focusing on historical, demographic, social and other issues that are specific to a region or where an issue or range of issues can be compared and contrasted between two or more locations. This comprehensive collection of articles providing high quality content, constitutes a definitive statement on the state of Jewish Education world wide, as well as through a wide variety of lenses and contexts. It is written in a style that is accessible to a global community of academics and professionals.

The International Handbook of Science Education is a two volume edition pertaining to the most significant issues in science education. It is a follow-up to the first Handbook, published in 1998, which is seen as the most authoritative resource ever produced in science education. The chapters in this edition are reviews of research in science education and retain the strong international flavor of the project. It covers the diverse theories and methods that have been a foundation for science education and continue to characterize this field. Each section contains a lead chapter that provides an overview and synthesis of the field and related chapters that provide a narrower focus on research and current thinking on the key issues in that field. Leading researchers from around the world have participated as authors and consultants to produce a resource that is comprehensive, detailed and up to date. The chapters provide the most recent and advanced thinking in science education making the Handbook again the most authoritative resource in science education.

The universality of the problematics with urban education, together with the importance of understanding the context of improvement interventions, brings into sharp focus the importance of an undertaking like the International Handbook of Urban Education. An important focus of this book is the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region.

The environment and contested notions of sustainability are increasingly topics of public interest, political debate, and legislation across the world. Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment, health, development, and education. The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education (EE) field. The purpose of this 51-chapter handbook is not only to illuminate the most important concepts, findings and theories that have been developed by EE research, but also to critically examine the historical progression of the field, its current debates and controversies, what is still missing from the EE research agenda, and where that agenda might be headed. Published for the American Educational Research Association (AERA).

This timely Handbook takes stock of the range of debates that characterise the field of international education and development, and suggests key aspects of a research agenda for the next period. It is deliberately divergent in its approach, recognising the major ideological and epistemological divides that characterise a field that draws on many traditions. Leading and emergent voices from different paradigms and contexts are afforded a space to be heard and each section puts current debates in larger historical contexts. The Handbook is divided in four parts and book-ended by an introduction and a conclusion, the latter oriented towards the implications that the volume has for future research agendas. The first part explores major strands of debates about education's place in development theory. The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching, and schools play in development. Part three looks beyond schools to consider early years, adult and vocational education but focuses particularly on the return to thinking about higher education's role in development. The final part considers the changing, but still important, role that international cooperation plays in shaping education in developing countries. Featuring over thirty chapters written by leading international and interdisciplinary scholars, the Routledge Handbook of International Education and Development offers the first comprehensive and forward-looking resource for students and scholars.
