Building the Internet of Things (IOT) using Raspberry Pi. The idea wasn't named until 1999; the Internet of Things has been in development for decades. The first Internet appliance, for example, was a Coke machine at Carnegie Mellon University in the early 1980s. The programmers might connect to the machine more to the internet, check the status of the machine and conclude whether or not there would be a cold drink pending on them, should they decide to make the trip down to the machine.

Building The (Internet of Things) IOT Using Raspberry Pi

It broadly covers introduction to Internet of Things and enabling technologies, interfacing with Raspberry Pi and Arduino and interfacing with Raspberry Pi GPIO. Internet of Things with Raspberry pi and Arduino is aimed at senior undergraduate, graduate students and professionals in electrical engineering, computer engineering including robotics.
