But these types of "fortune tellers" give you only limited advice—more like a weather report. They tell you if things will get better or get worse, whether the boyfriend or girlfriend you just broke up with come back, whether that check you've been waiting for will be in the mail, or whether your loved one's health will improve. All that's left is for you to go home and wait for things to happen. Well,

The first guidebook to discuss the full scope of the intuitive process and propose structures to keep practitioners and clients safe Heidi Light, a family

Online Library Intuitive Medical Solutions

counselor and certified hypnotherapist, asserts that we are in desperate need of guidance and standards so that we can approach the world of intuition, energy, and mysticism from a healthy and respectful place.

Drawing from her more than forty years as a medical intuitive, empath, and energy tracker—as well as twenty years as a counselor in private, clinical, and institutional settings—Light offers practical, simple solutions to the alarming lack of boundaries in the fields of intuition and energy medicine. From massage therapists who just throw in a little extra

energy work, to psychics who read your sister instead of you, or to practitioners who tell you to take off your clothes, Light shares case studies and vignettes of ethical boundaries mistakenly being crossed. This book explains the traditional psychological model of ethics that counselors and psychologists are taught and outlines an ethical energetics model as a framework for moving through the process of accessing intuitive information and working with energy. Experienced energy workers, those new to the field and just opening to their intuition, and those

who come to them for services need to know these ethical guidelines of boundaries and consent.
