Better Learning Solutions Through Better Learning Experiences When training and development initiatives treat learning as something that occurs

solving methodology that focuses on involving users of a solution in its design. For effective design thinking, talent development professionals need to go beyond the UX, the user experience, and incorporate the LX, the learner experience. In this how-to guide for applying design thinking tools

and techniques, Sharon Boller and Laura Fletcher share how they adapted the traditional design thinking process for training and development projects. Their process involves steps to:

- Get perspective.
- Refine the problem.
- Ideate and prototype.
- Iterate (develop, test, pilot, and refine).

- Implement. Design thinking is about balancing the three forces on training and development programs: learner wants and needs, business needs, and constraints. Learn how to get buy-in from skeptical stakeholders. Discover why taking requests for training, gathering the perspective of
