textile materials  
comprises a very large  
and complex global  
industry that utilises a  
diverse range of fibre  
types and creates a  
variety of textile  
products. As the great  
majority of such  
products are coloured,  
predominantly using  
aqueous dyeing  
processes, the coloration  
of textiles is a large-

# Read Online Nelson Thornes

scale global business in which complex procedures are used to apply different types of dye to the various types of textile material. The development of such dyeing processes is the result of substantial research activity, undertaken over many decades, into the physico-chemical aspects of dye

Read Online  
Nelson Thornes

adsorption and the establishment of 'dyeing theory', which seeks to describe the mechanism by which dyes interact with textile fibres. Physico-Chemical Aspects of Textile Coloration provides a comprehensive treatment of the physical chemistry involved in the dyeing of the major

# Read Online Nelson Thornes

types of natural, man-made and synthetic fibres with the principal types of dye. The book covers: fundamental aspects of the physical and chemical structure of both fibres and dyes, together with the structure and properties of water, in relation to dyeing; dyeing as an area of study as well as the terminology

# Read Online Nelson Thornes

employed in dyeing  
technology and science;  
contemporary views of  
intermolecular forces  
and the nature of the  
interactions that can  
occur between dyes and  
fibres at a molecular  
level; fundamental  
principles involved in  
dyeing theory, as  
represented by the  
thermodynamics and  
kinetics of dye sorption;

# Read Online Nelson Thornes

detailed accounts of the mechanism of dyeing that applies to cotton (and other cellulosic fibres), polyester, polyamide, wool, polyacrylonitrile and silk fibres; non-aqueous dyeing, as represented by the use of air, organic solvents and supercritical CO<sub>2</sub> fluid as alternatives to water as application medium.

# Read Online Nelson Thornes

The up-to-date text is supported by a large number of tables, figures and illustrations as well as footnotes and widespread use of references to published work. The book is essential reading for students, teachers, researchers and professionals involved in textile coloration.
