First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

This book contains advanced subjects in solid state physics with emphasis on the theoretical exposition of various physical phenomena in solids using quantum theory, hence entitled " A modern course in the quantum theory of solids ". The use of the adjective " modern " in the title is to reflect the fact that some of the new developments in condensed matter physics have been included in the book. The new developments contained in the book are mainly in experimental methods (inelastic neutron scattering and photoemission spectroscopy), in magnetic properties of solids (the itinerant magnetism, the superexchange, the Hubbard model, and giant and colossal magnetoresistance), and in optical properties of solids (Raman scattering). Besides the new developments, the Green's function method used in many-body physics and the strong-coupling theory of superconductivity are also expounded in great details.

This work is a reconstruction of the Pre?colonial, colonial and post-colonial history of the Yakurr of South Eastern Nigeria. It is primarily, based on Yakurr Oral Sources. The Study provides a historical foundation hence its title. It is hoped that future historians shall build upon that foundation. However, the work examines the collapse of the Wukari Empire (Jukun/Kororofa) and the development of the Atlantic Slave trade as the principal causal factors of the migrations of the various peoples who now occupy the middle and upper Cross River Regions. Such people include the Yalla, Ukelle (upper Cross River), Boki, Agbo, Bahumono, Mbembe and Yakurr (middle Cross River) region.
