Adding a pause a few inches off the chest on the way up is a

fantastic – and logical – way to train your sticking point without

resorting to a reduced range of motion. Rather than starting at your sticking

point, you bring the bar down through a full range of motion. Bring the bar down, touch your chest, press back up and pause a few inches off your chest.

Briefings

Having a sticking point means that you have difficulty moving a weight at certain points of a movement. For

example, let's say you bench press with heavy weight and you might notice a

part of the
movement where
you struggle. If
you don't bring
the weight all
the way down to
your chest, then
your sticking
point may be at
the bottom of
the movement.
