Segal analyzes Asian immigration to the U.S., including immigrants' reasons for leaving their countries, their attraction to the U.S., the issues they face in contemporary U.S. society, and the history of public attitudes and policy toward them.

For more than a million years, man's utter dependence on technology has been producing a host of intricate problems. For example, we steadily reduce the need for human labor while finding ways to increase life expectancy. We mass produce the automobile without grasping the harsh effects it leaves on the environment. The Human Legacy concerns the evolution and development of man—physically, socially, psychologically—into the latest version of the species we see around us today. The author paints an intriguing picture of man, living in complex societies and trying to solve the unanticipated consequences of action.

What would you give to live forever? Elijah Brighton wants to become an ascender—a post-Singularity human/machine hybrid—after all, they're smarter, more enlightened, more compassionate, and above all, achingly beautiful. But Eli is a legacy human, preserved and cherished for his unaltered genetic code, just like the rainforest he paints. When a fugue state possesses him and creates great art, Eli miraculously lands a sponsor for the creative Olympics. If he could just master the fugue, he could take the gold and win the right to ascend, bringing everything he's yearned for within reach... including his beautiful ascender patron. But once Eli arrives at the Games, he finds the ascenders are playing games of their own. Everything he knows about the ascenders and the legacies they keep starts to unravel... until he's running for his life and wondering who he truly is. The Legacy Human is the first in a philosophical HopePunk sci-fi series that explores the intersection of mind, body, and soul in a post-Singularity world. KEYWORDS: Robots, androids, artificial intelligence, singularity, cyborg, spiritual, religion, AI, cyberpunk, dystopian, free science fiction

Reconsiders the questions of evolution made in the wake of the stunning discovery of a 3.2 million year-old female skeleton known as Lucy, a new and transitional species placed somewhere between apes and humans that would forever change the way scientists think about human origins.
