There is no right or wrong answer. Sharing a run with a group or on your own can be very therapeutic for your mental and emotional health. It lets you release stress, and the act of exercising helps to release the feel-good hormones (endorphins) in our bodies. They call it "runner's high" for a reason!

Training and Racing with a Power Meter brings the advanced power-based training techniques of elite cyclists and triathletes to everyone. A power meter can unlock more speed and endurance than any other training tool—but only if you understand the data. This new third edition of Training and Racing with a Power Meter updates the comprehensive guide that was last published almost 10 years ago. Using this updated guide, any rider can exploit the incredible usefulness of any power meter. Pioneering cycling coach Hunter Allen and exercise physiologists Dr. Andy Coggan and Stephen McGregor show how to use a power meter to find your baseline power data, profile your strengths and weakness, measure fitness and fatigue, optimize your daily workouts, peak for races, and set and adjust your racing strategy during a race. New in this third edition: All-new power metrics: FRC, Pmax, mFTP, Power Duration Curve, and more Two new power-based training plans for masters cyclists and triathletes New training plans to raise Functional Threshold Power Over 100 new power-based workouts New guidance for triathletes on pacing the bike and run New case studies on masters cyclists and triathletes Methods to test power duration and pinpoint weaknesses in a variety of race distances 100 newly illustrated charts Training and Racing with a Power Meter, 3rd Ed. is the definitive, comprehensive guide to using a power meter. Armed with the revolutionary techniques from this guide, cyclists and triathletes can achieve lasting improvements and their best performances ever.

Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power.

This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

“Welcome to what will undoubtedly be a whole new level of athletic performance.”—Mark Allen, six-time winner of the Hawaii Ironman.

Training and Racing with a Power Meter brings the advanced power-based training techniques of elite cyclists and triathletes to everyone. A power meter can unlock more speed and endurance than any other training tool—but only if you understand the data. This new third edition of Training and Racing with a Power Meter updates the comprehensive guide that was last published almost 10 years ago. Using this updated guide, any rider can exploit the incredible usefulness of any power meter. Pioneering cycling coach Hunter Allen and exercise physiologists Dr. Andy Coggan and Stephen McGregor show how to use a power meter to find your baseline power data, profile your strengths and weakness, measure fitness and fatigue, optimize your daily workouts, peak for races, and set and adjust your racing strategy during a race.

Matt Fitzgerald has already made a name for himself in the endurance sport community with books like 80/20 Running, How Bad Do You Want It? and Iron War. He is an accomplished amateur runner, but if he follows the training, nutrition and lifestyle of an elite runner, just how fast could he go? He is approaching his mid-forties, so the time to do this is now. He at last has the financial means to do nothing but train. He accepts the goodwill of a friend who will let him crash at his apartment in the running mecca of Flagstaff, Arizona, and convinces the coach of Northern Arizona Elite, one of the country's premier professional running teams, to let him train with a roster of national champions and Olympic hopefuls for an entire summer leading in to the Chicago Marathon. The results were astounding...Filled with a vibrant cast of characters, rigorous and gut-wrenching training, Matt's knowledgeable yet self-deprecating voice allows us to vicariously live out our own fantasies of having the opportunity to go all the way. Yet for the runners Matt trains with, it's no mere fantasy, but a calling and their individual stories enrich this inspiring narrative. Running the Dream is a chance for us all to experience a bit of this rarified and wild world, and to take away pieces of this amazing journey to try to achieve our own potential.

USA-Triathlon, the national governing body for multi-sport racing, is committed to fostering the duathlon as the organization's "growth sport." With the full backing of USA-Triathlon—including sections on duathlon history and the forthcoming USA-T program for promoting duathlon—author Steven Jonas has penned the first modern guide for the aspiring multi-sport racer who cannot or simply doesn't want to swim. Well known for his original ground-breaking book Triathloning for Ordinary Mortals, which has sold nearly 50,000 copies in two editions, and his USA-Triathlon Life column "Ordinary Mortals ®: Talking Triathlon with Steve Jonas," the author covers: how the run-bike-run duathlon works; how to have fun, get and stay fit, and promote your health doing duathlons; the training principles and programs for races of varying lengths, from starting from scratch to Doin' the Du on a regular basis throughout the season, centered on a series of 13-week training programs; finding and choosing your races; the basic techniques of running, cycling and fast walking (which can be used on the run legs in both duathlon and triathlon); equipment; race planning and racing; and duathlon as part of a total program for healthy living. This book provides a wealth of knowledge and inspiration from a 29-season multi-sport racer, a prolific author on the subject, who is also a physician and professor of preventive medicine.

This practical book is aimed at all greyhound enthusiasts and will be of help to the more experienced professional trainer as well as the novice handler. The physical stresses of racing mean that every greyhound will, at some point, sustain some form of injury and it is therefore essential that the greyhound handler has some knowledge of injuries. Accordingly, the author places a strong emphasis on injury prevention, diagnosis, treatment and rehabilitation. Contents include: Choosing your first dog; The fundamental aspects of training; Kennelling; Breeding, rearing and training puppies; Exercising, the training routine and race preparation; Feeding; Examining your dog, minor ailments and serious illnesses; Foot problems; Injury rehabilitation and the skill of massage; Retired greyhounds. This wide-ranging and practical book is aimed at all greyhound enthusiasts including those who train and race them, care for them or own them as pets. Fully illustrated with 69 colour photographs and 20 drawings.

The bestselling author of 80/20 Running and How Bad Do You Want It? reveals his inspiring and surprising journey to see just how fast he can go. Matt Fitzgerald has been running (and writing about running) for most of his adult life. But, like many passionate amateur runners, he never felt he was quite fulfilling his potential. If he follows the training, nutrition, and lifestyle of an elite runner, just how fast could he go? In his mid-forties, Matt at last has the freedom to do nothing but train, if only for the span of one summer. The time is now. He convinces the coach of Northern Arizona Elite, one of the country's premier professional running teams, to let him train with a roster of national champions and Olympic hopefuls in the running mecca of Flagstaff, Arizona, leading in to the Chicago Marathon. The results completely redefined Matt's notion of what is possible, not only for himself but for any runner. Filled with a vibrant cast of characters, rigorous and quad-torching

training, and a large dose of self-deprecating humor, Matt's gripping account of his "fake pro runner" experience allows us to partake in the dream of having the chance to go all the way. Yet for the gifted young runners Matt trains with, it's not a dream but concrete reality, and their individual stories enrich this inspiring narrative. Running the Dream pulls us into the rarified world of professional running in a way we can all relate to, regardless of speed, and to take away pieces of one man's amazing journey to try to achieve our own potential.

From the personal tragedy of a stillbirth to a first Ironman and beyond, ordinary stay-at-home mom of 5 kids Mette Ivie Harrison learns life lessons about accepting herself, moving on, pushing to become better, and bringing her family along the way.

Obstacle Race Training Bible provides readers with one-stop access to everything they need to know to prepare for and successfully complete a Tough Mudder, Spartan Race, Warrior Dash, or any of the other international or regional obstacle races that are taking the world by storm. All of these races combine running various distances and terrain with hard-core obstacles that are both physically and mentally challenging: climbing through pitch-black flooded tubes and over walls, carrying logs uphill, traversing monkey bars, crawling through mud and under barbed wire, leaping over burning hay bales, swimming in ice cold water, navigating through live wires, and more. This combination of running and obstacles is what gives participants a very different kind of challenge than they get with a 5K, marathon, or triathlon. It's a combination that also requires a very different approach to training and preparation, and that's what this book provides. Coverage includes: - Profiles of all the major races: running distance, obstacles involved, completion percentage, fitness level required, etc. - Obstacle overviews, including photos of what they look like, the mental and physical challenges involved, and the most effective strategies for completing them - Obstacle-specific exercises that condition participants for the strength, stamina, flexibility, and mental toughness needed to complete the obstacle - 8-week training programs designed for complete novices, elite athletes, and everyone in between Important information on what to wear, nutrition during training, and race day strategies
