Occupational therapists who work with adults with neurological problems must be able to appropriately and quickly use a variety of screening methods to pinpoint deficit areas and assess how these have impaired the person's daily life function. This comprehensive book compiles the most common occupational therapy screening methods used with adults with neurological conditions. Presented as a step-by-step instruction manual, the book includes copies of all screens and is presented in an easy-to-use format that facilitates its use in the clinic and in home health and community-based settings. It is also an ideal text for students, clearly outlining how to administer neurological screens in occupational therapy practice. Extensive use of photographs enhances the instructions and clearly shows practitioners how to use the various techniques. Book

This book addresses the need for comprehensive review of therapeutic options that are known to be efficacious in the management of cutaneous diseases in children. It summarizes evidence-based literature on clinical responses among pediatric patients, including age-appropriate management strategies. Included is review of the extraordinary developments in understanding of the genetics and pathogenesis of many cutaneous disorders during the past decade, the novel therapeutic options and repurposing of old drugs, and the management of some of the most challenging skin disorders. Therapy in Pediatric Dermatology: Management of Pediatric Skin Disease is a succinct, user-friendly, and up-to-date therapeutic dermatologic textbook for physicians who care for children with skin disorders. Each skin condition is discussed with investigative and treatment recommendations in mind and provided based on extensive review of the literature. This book will provide unbiased, yet concise, information that is valuable to practitioners who manage pediatric patients in their practices.
